Commissioner of Patents
Washington, D.C. 20231

Dear Sir:

This paper is a petition for acceptance of color photographs pursuant to 37 C.F.R. § 1.84 and M.P.E.P. § 608.02. The Draftsperson has objected to Figs. 1-3B, and 6-8B of the above-referenced application on the grounds that those figures are in color. The three required sets of color photographs are being submitted in the Submission of Formal Drawings mailed April 24, 2003.

The photographs objected to depict the responses of human beings and experimental animals to a treatment for inflammation. The color photographs show the redness of inflamed skin or mucous membranes, as well as the absence of redness induced as a consequence of the use of the claimed invention. Since one of the hallmarks of inflammation is redness and swelling of the tissue, applicant considers these color photographs to be necessary for a proper disclosure of the invention described and claimed in the above-referenced patent application.
